Abstract

This is a simple paragraph at the beginning of the document. A brief introduction about the main subject.

Paragraph1: After our abstract we can begin the first paragraph, then press “enter” twice to start the second one.

Paragraph2: This line will start a second paragraph.

Paragraph3: I will start the third paragraph and then add a manual line break which causes this text to start on a new line but remains part of the same paragraph. Alternatively, I can use the `\newline` command to start a new line, which is also part of the same paragraph.
